

**NONFATAL MOTOR VEHICLE TRAFFIC CRASHES
BY YEAR, REGION, CRASH SEVERITY, AND HIT AND RUN TYPE
GENERAL ESTIMATES SYSTEM (GES) 2002 TO 2006**

**NOTE: The numbers for injury and property damage only crashes are not actual counts, but estimates of the actual counts.
The estimates are calculated from data obtained from a nationally representative
sample of crashes collected through NHTSA's General Estimates System (GES).
Estimates less than 500 indicate that the sample size was too small to produce
a meaningful estimate. Please note totals may have some round off error.**

Year and Region		Injury Crashes						Property Damage Only Crashes						Total					
		No hit and run		hit and run		Total		No hit and run		hit and run		Total		No hit and run		hit and run		Total
